

QMS I/II Asphalt Plant Tech

Job Description

POSITION TITLE: QMS I/II Asphalt Plant Tech

DEPARTMENT: Farmville Plant Operations

PRIMARY FUNCTION:

The role of an Asphalt quality control technician is to inspect, sample and conduct laboratory testing on various construction materials according to the appropriate standard test methods. Applicants will perform tests to ensure quality of products at the point of production, shipping, and arrival upon the jobsite. When any plant or jobsite problems arise, applicant will be expected to analyze the problem and develop solutions.

Applicants will visually inspect stockpiles, material sources, and truck loads at asphalt plant. Applicants will verify test results of outside testing laboratories and maintain accurate and timely records on test data, product quality, and state agency requirements.

Responsibilities:

- Inspection, Sampling, and Testing
 - Conduct routine testing on stone and sand products to ensure that gradations and other material properties are being maintained at target values.
 - Conduct testing on HMA production to ensure that government agency specifications are met.
- HMA Mix Designs
 - Creates and updates HMA mix designs to meet ever-changing specifications
- Continuing Education
 - Stays up to date on all training requirements and certifications.
 - Knows the current state specifications and understands any changes made from year to year.
- Recordkeeping and Housekeeping
 - Ensures that the testing laboratories are kept neat, clean, and all tools and equipment are properly maintained, calibrated, and in good working order
 - Completes all required paperwork and maintains a neat, organized file system
 - Ensures all state required approvals and certifications are kept up to date
- Safety
 - Understands and complies with OSHA and MSHA regulations
 - Understands and complies with corporate safety policies and requirements
 - Skilled in the safe operation of trade-specific tools and equipment
- Environmental Compliance
 - Maintains recordkeeping for various environmental regulations, including above ground storage tanks, air quality permits, stormwater management.
